

Abdrakh1

Week 1 Final Project

Manual test plan:

1. Test out the login functionality
 - 1) Go to website, click login with Facebook

Join your friends' events!

Login to Decidr to coordinate your hang outs and meet ups!

iPhone

An iPhone app is going to be made in a little

Android

An Android app is going to be made in a little

Windows Phone 8

An Windows Phone app is going to be made in

- 2) Note that once you are logged in “Login” is replaced by “Logout”

Join your friends' events!

Login to Decidr to coordinate your hang outs and meet ups!

iPhone

An iPhone app is going to be made in a little

Android

An Android app is going to be made in a little

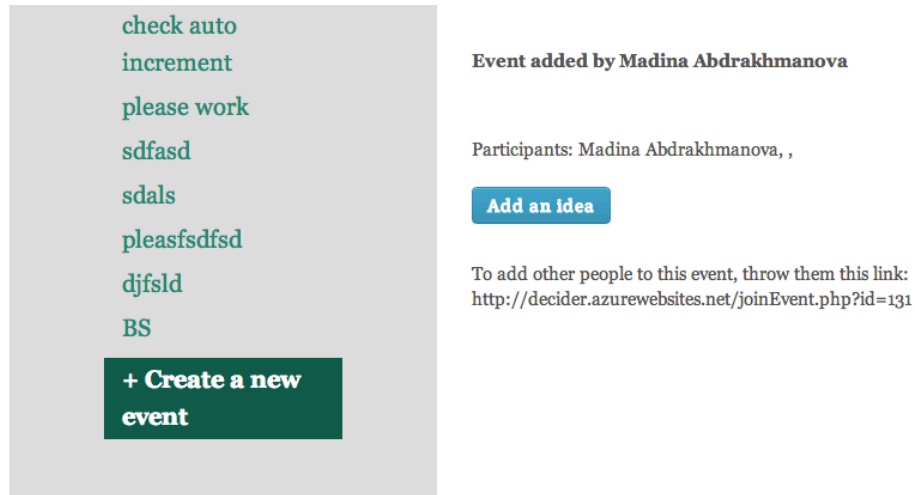

Windows Phone 8

An Windows Phone app is going to be made in

- 3) Try to logout and log back in several times
- 4) Once you logged in open the website, click on “Events” and you should be transferred to the Event page

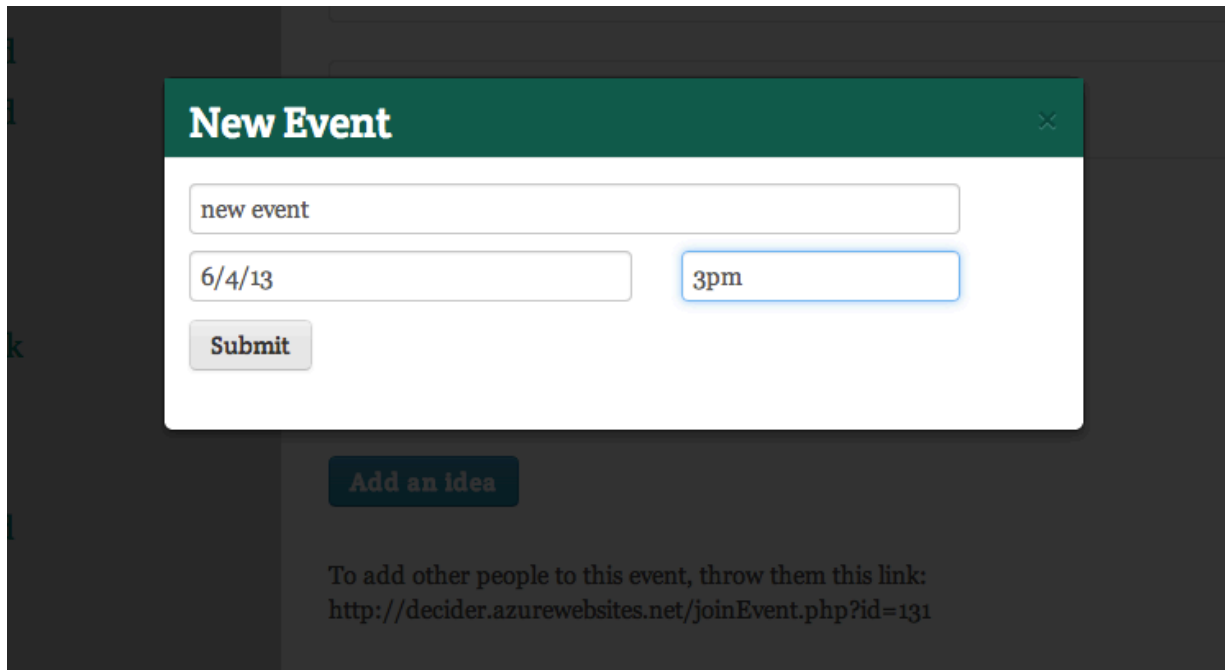

2. Test database insertions

1) Click create event on left sidebar.

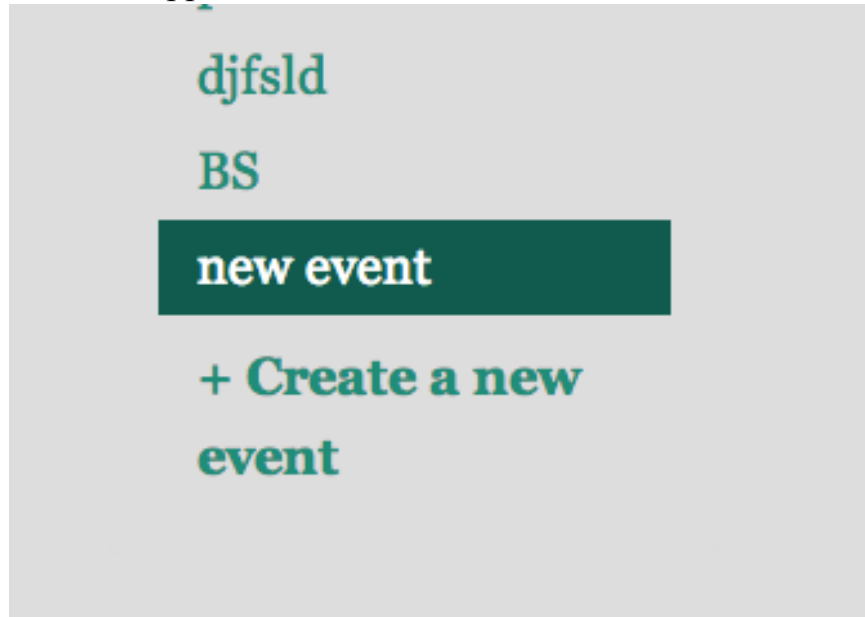

The image shows a sidebar on the left with a list of items: "check auto", "increment", "please work", "sdfasd", "sdals", "pleasfsdfsd", "djfsld", and "BS". At the bottom of the sidebar is a green button labeled "+ Create a new event". To the right of the sidebar, the page displays "Event added by Madina Abdrakhmanova". Below this, it says "Participants: Madina Abdrakhmanova, ,". There is a blue button labeled "Add an Idea". At the bottom, it says "To add other people to this event, throw them this link: <http://decider.azurewebsites.net/joinEvent.php?id=131>".

2) Enter information

The image shows a "New Event" form. The form has a title bar "New Event" with a close button (X). Below the title bar, there are three input fields: a text field containing "new event", a date field containing "6/4/13", and a time field containing "3pm". Below these fields is a "Submit" button. At the bottom of the form, there is a blue button labeled "Add an Idea". Below the button, it says "To add other people to this event, throw them this link: <http://decider.azurewebsites.net/joinEvent.php?id=131>".

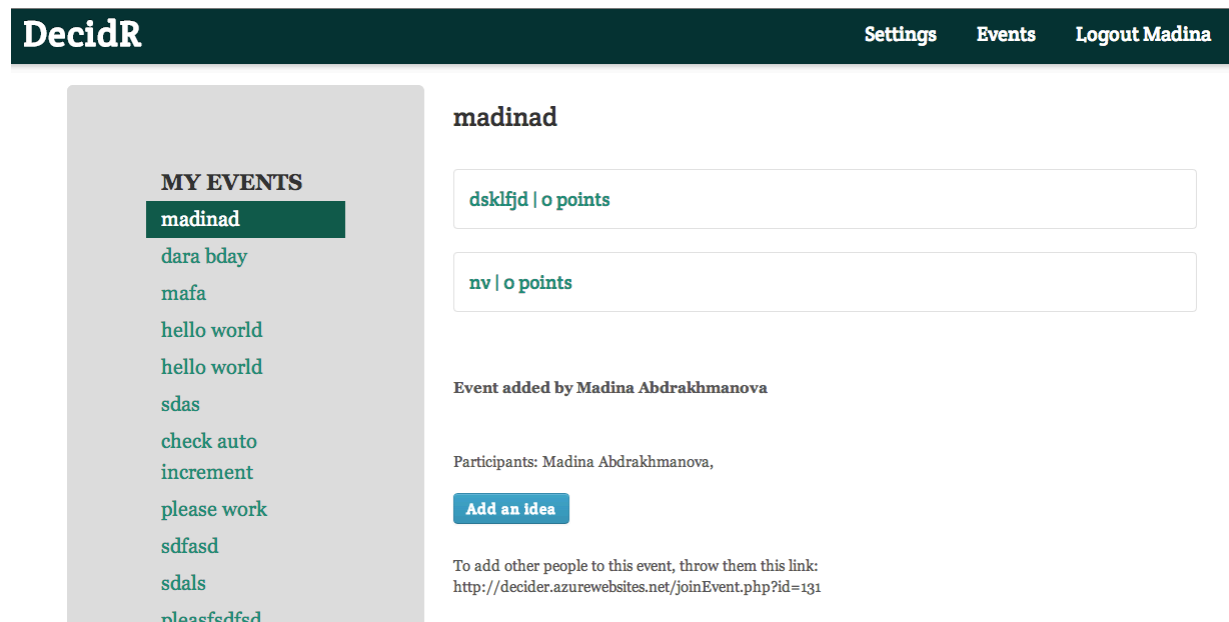

- 3) It should appear in the end of the left sidebar

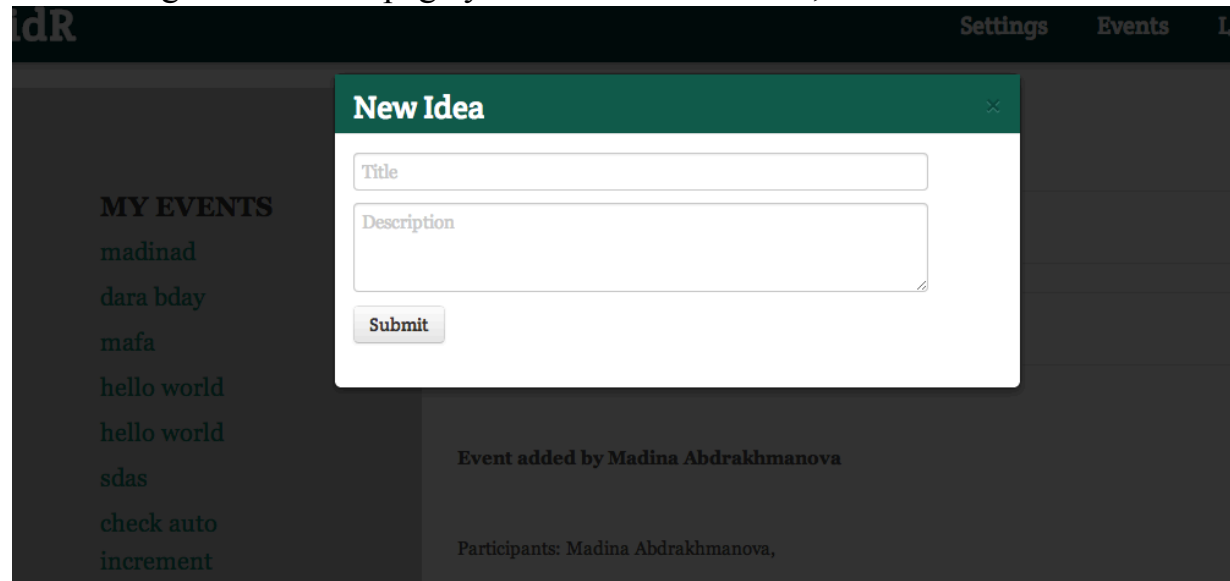

- 4) Test out the add event functionality with different inputs

3. Test creating ToDo ideas

- 1) Click on one of the events

- 2) On the right side of the page you will see “add idea”, click it

The screenshot shows a web application interface. At the top, there's a dark header with 'idr' on the left and 'Settings', 'Events', and 'Log out' on the right. A 'New Idea' modal is open in the center, featuring a green title bar, a 'Title' input field, a 'Description' text area, and a 'Submit' button. In the background, a sidebar on the left lists 'MY EVENTS' with items like 'madinad', 'dara bday', 'mafa', 'hello world', 'hello world', 'sdas', 'check auto', and 'increment'. The main content area on the right shows 'Event added by Madina Abdrakhmanova' and 'Participants: Madina Abdrakhmanova,'.

- 3) Add several ideas to make sure they all appear as a list of collapses
4. Test event joins
 - 1) Create an event and copy the link at the bottom of the page

Participants: Madina Abdrakhmanova

Add an idea

To add other people to this event, throw them this link:
<http://decider.azurewebsites.net/joinEvent.php?id=321>

- 2) Send the link to another user. The user should open the link and the event should appear in the end of the list of his or her events
- 3) Check if the user is one your list of participants
- 4) The user should see that you created the event on his/her event wall too.
